Company Overview:

Toyota Financial Services (TFS) is a captive finance company providing financing and insurance products to authorized Toyota dealers, affiliates and customers throughout the United States and Puerto Rico.

With its affiliates, **TFS** is dedicated to supporting **Mobility for All** and development of **Cononnected, Autonomous, Shared and Electric technology.**

Strategic Innovation is a dynamic incubator for innovation within TFS, focusing on **growing new business** through pilot programs and partnerships.

Vendor Cost Data Standardization

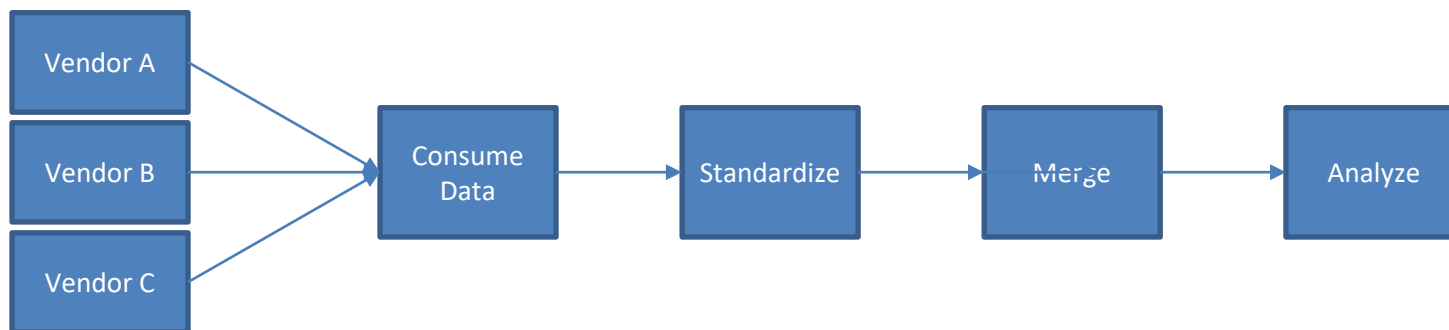

Problem Statement:

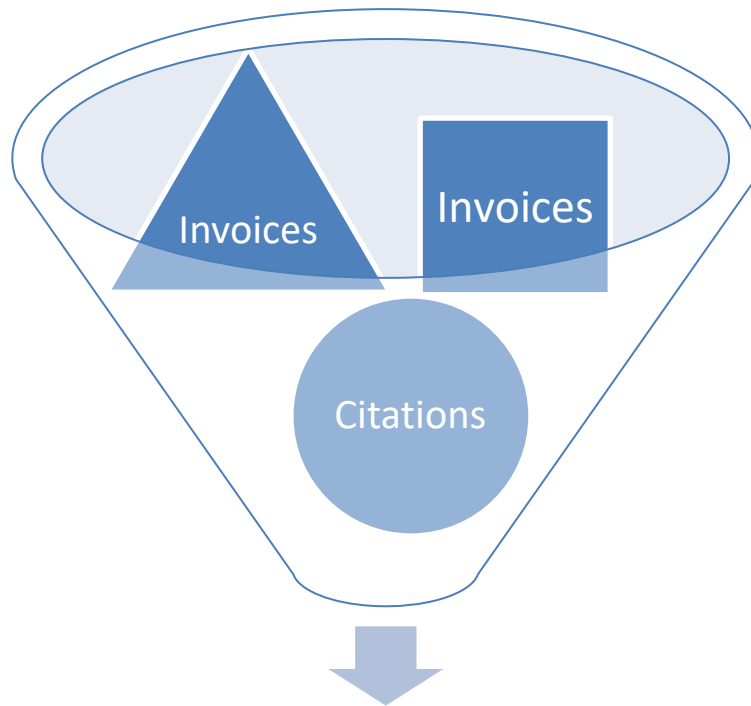

Vehicles service providers in the mobility space is very fragmented. As a result of this, mobility providers such as KINTO and SI Share are unable to effectively track costs at the vehicle level due to inability to consume the data.

Output/Ideal State:

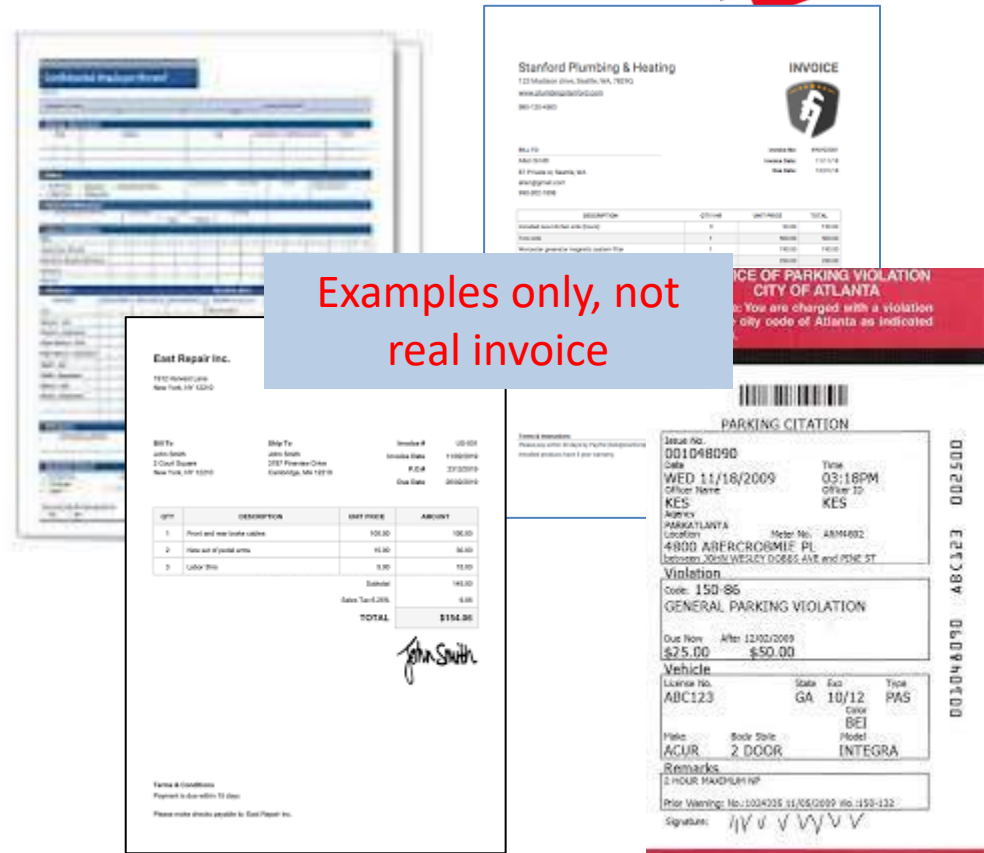

A tool that allows mobility providers to consume the fragmented data from service providers, standardize it, and then combine it with an existing database, so that we can analyze the data for insights on cost.

Vendor Cost Data Standardization

Standardized Database by
VIN/Plate/Vehicle #

Goal & Stretch Goal

Goal:

- Create a tool that will standardize different types of vendor data
- Generate an output that aggregates the data and can be merged into a data lake

Stretch Goal:

- Automated way to read PDF cost files for key data fields
- Build a reporting dashboard that summarizes data with customizable filters

Vendor Cost Data Standardization

Skill Sets

What you bring

- UI/UX design skills
- Programming language
- Analytical & Reporting Skills
- Operations/Process Management
- Database & Architect knowledge

What we bring

- Business knowledge
- Business rules and processes
- Mentorship and Networking opportunity

Vendor Cost Data Standardization

Logistics

- Meeting Frequency – Weekly
- Method - Microsoft Teams
